

Milestone Delivery #3
CSE-2102 Group Project - Spring 2026
Deadline: 11:59pm, March 6

Pre-Requisite

- Feature list from Milestone #2

Project Board

- Create cards and assign them to teammates for all work relating to this milestone delivery.
- Keep your project board up-to-date

Figma

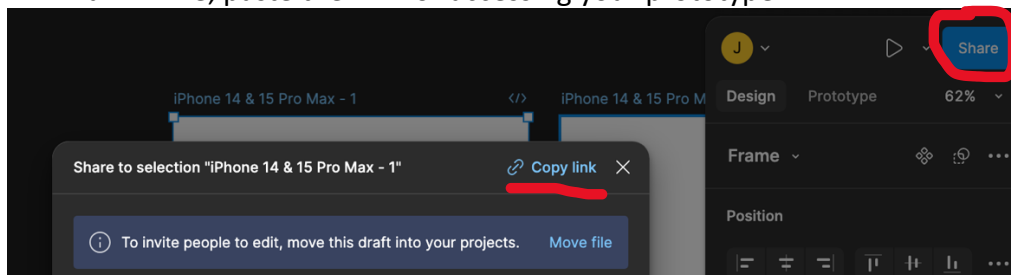

- Create a clickable wireframe prototype for your Farm Marketplace application. Unlike the lab that used a mobile phone-sized screen layout, this prototype will be for a desktop browser.
- Create every screen dictated by your Feature List from milestone #2.
- Connect the screens using buttons, links, or other UX widgets.

Git

- Create a feature branch
- Create a "docs" folder in the root of your repo
- Place your milestone #2 document(s) into the "docs" folder. Store the word processing document, not the PDF.
- Add the link to your prototype into the README file
- Push the feature branch. Open a PR for merging to develop. Open a PR for merging to main.

Grading

- In a PDF file, paste the link for accessing your prototype.

- One team member should submit the PDF to HuskyCT by the milestone deadline. You may submit multiple time prior to the deadline. It is strongly recommended you do so in case you run into any last minute technical or team issues.
- You will meet with a TA during your lab. Your team may not yet be complete with all the milestone tasks, but your TA will be looking at:

- Current status of your project board
 - Current status of your prototype
 - Team collaboration and communication.
- Note: You are not being graded on the artistic nature of your prototype. So don't overly fixate on getting it to look too "pretty." But do the best you can. You are being graded on the completeness of your prototype and that it captures all your features.
